

A dual degree in Electrical and Computer Engineering can be received by taking about 14 credit-hours of additional coursework, provided one carefully plans their course schedule. While the plan will vary for each student, one possibility is given beginning on the next page. In any case, students should discuss their plans with their advisor and carefully monitor their CAPS reports to ensure they are consistently meeting the requirements of both programs.

Example course-plan for a dual degree in CpE and EE:
