

Grad Track Pathway Admission and Standards

Overview

A Grad Track Pathway offers early provisional admission to the master's degree program to exceptional undergraduate students and is designed for these students to earn coursework credit towards their master's degree while completing their bachelor's degree. The pathway is defined by a set of graduate-level courses (up to nine credit hours) that apply towards the bachelor's degree and then also towards the associated master's degree.

Graduate coursework taken for undergraduate credit will be considered advanced level, will be included in the student's undergraduate GPA, and will be assessed undergraduate tuition rates. Advanced level coursework includes any 5000- or 6000-level lecture courses selected by the department for use in the pathway.

Graduate coursework taken for undergraduate credit as part of the pathway applies to the associated master's degree when the student has completed the bachelor's degree, has been admitted to the associated master's degree program, and the Form 1 (Plan of Study) has been approved.

Admission and Standards

1. A department must have an established pathway between a bachelor's and a master's degree. Usually, the master's degree will be in the same discipline as the bachelor's degree the student is pursuing, although, it is not required.
2. A student is eligible to apply to the pathway once the following criteria are met:
 - a. Must be active in a bachelor's degree program (it is recommended students apply at least 30 days prior to completing the bachelor's degree).
 - b. Must have a 3.0 minimum cumulative GPA.
 - c. Must have a 3.5 minimum GPA in the group of designated courses specified by the department.
3. Eligible students must submit the Grad Track Pathway (GTP) Admission and Course Approval Form for approval to their undergraduate advisor, graduate advisor, department chair or designee, and then the approved application to the Graduate Education office. The approved GTP Admission and Course Approval Form ensures the pathway courses will satisfy degree requirements for the student's bachelor's degree program.
4. Students must maintain a cumulative GPA of at least 3.00 until they receive their bachelor's degree. Students must receive grades of B or better in the graduate courses they enroll in as part of the pathway course sequence. If all requirements are met, the approved shared credit courses on the GTP Admission and Course Approval Form may be listed on the Form 1 (Plan of Study) to be used to meet the master's degree program requirements. **ALL** courses approved for shared credit on the GTP Admission and Course Approval form must meet requirements and be listed on the Form 1.
5. Students admitted into the GTP must formally apply for admission to the master's program associated with the pathway. This requires submitting a formal application for admission so that the semester admit term for the master's degree immediately follows the semester that the bachelor's degree is awarded. In the admission application, the student will be able to indicate that they are currently enrolled as a Grad Track Pathway student. Individual departments may require additional documents such as unofficial copies of transcripts, statements of purpose, letters of recommendation, or standardized test scores.
6. If a student does not satisfy the pathway requirements above, they may still be admitted to the master's program, but will not be able to apply the courses from the bachelor's degree towards their master's degree.
7. Grades earned in graduate-level courses while officially registered as an undergraduate student will count towards the student's cumulative undergraduate GPA, and cannot be factored into the cumulative graduate GPA.
8. Credits earned in graduate-level courses will be posted according to established registrar procedures to the undergraduate transcript and will apply towards the student's undergraduate degree hours as needed to obtain the undergraduate degree and thus ensure all stated degree requirements are met.
9. Once the bachelor's degree is awarded, the student is fully admitted to the associated master's program, and the Form 1 is approved, the courses from the pathway will be included on the student's graduate degree audit.
